

1. Created Database loan_prediction_db using below SQL:

create database loan_prediction_db;

mysql db username and password that I have is root and root respectively. (Have configured same in app.py).

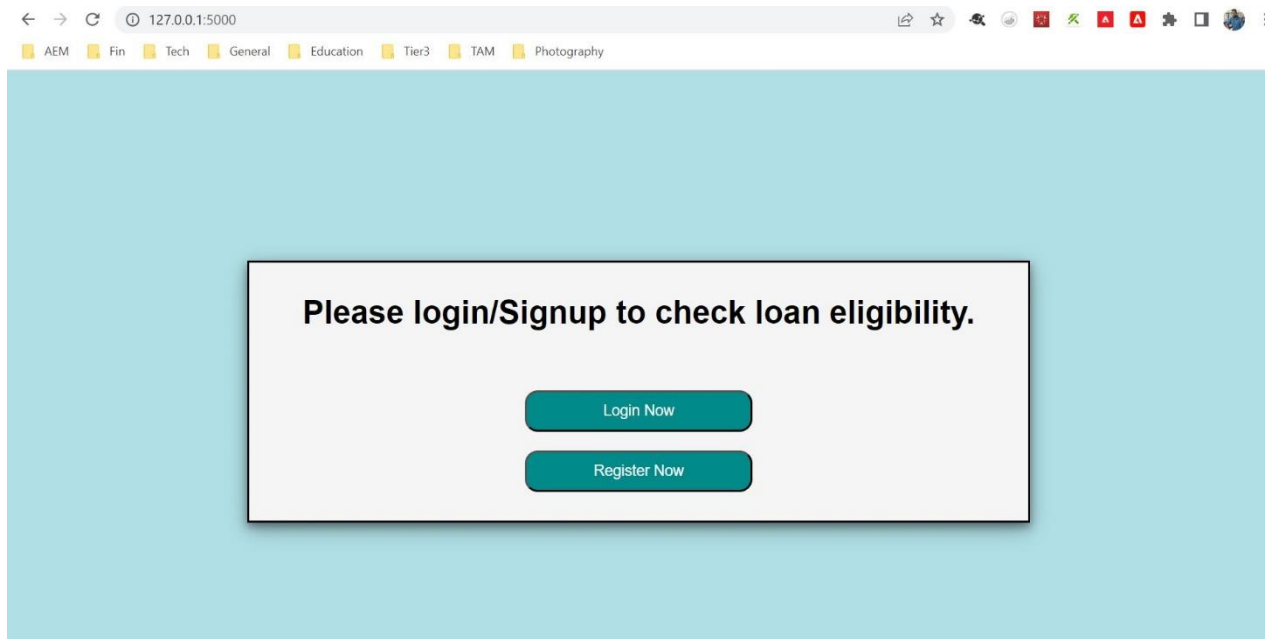

2. Project opened with app.py and have run the app – app is active now on <http://127.0.0.1:5000>

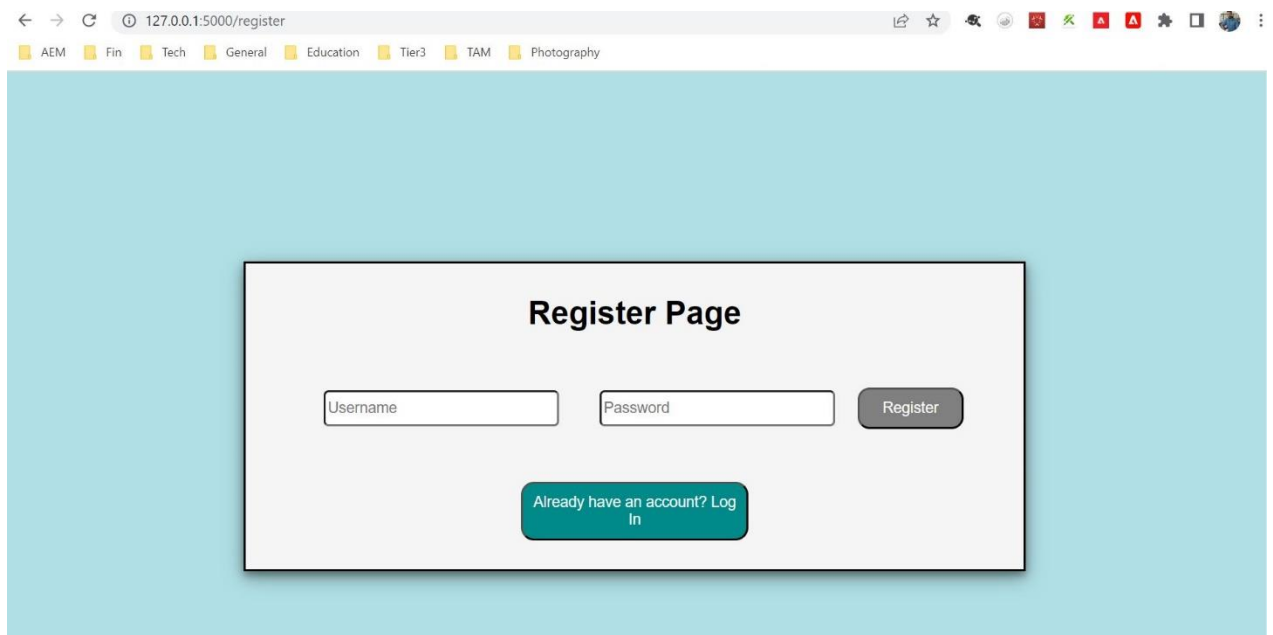

Click on the server <http://127.0.0.1:5000> to launch home page

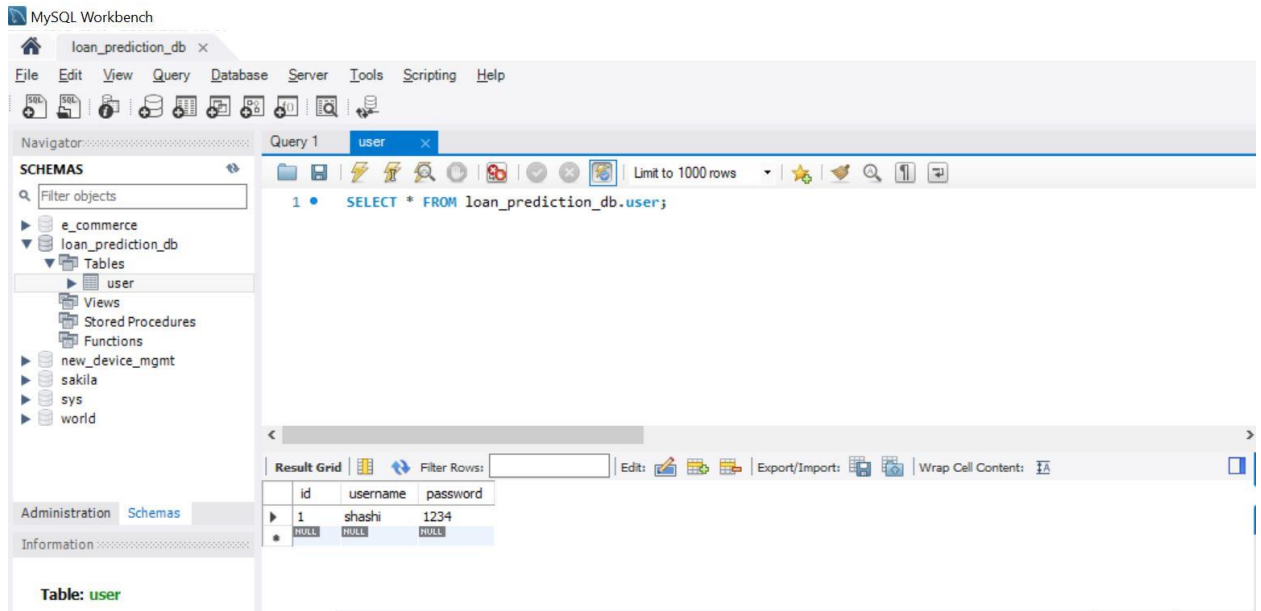

3. Home page

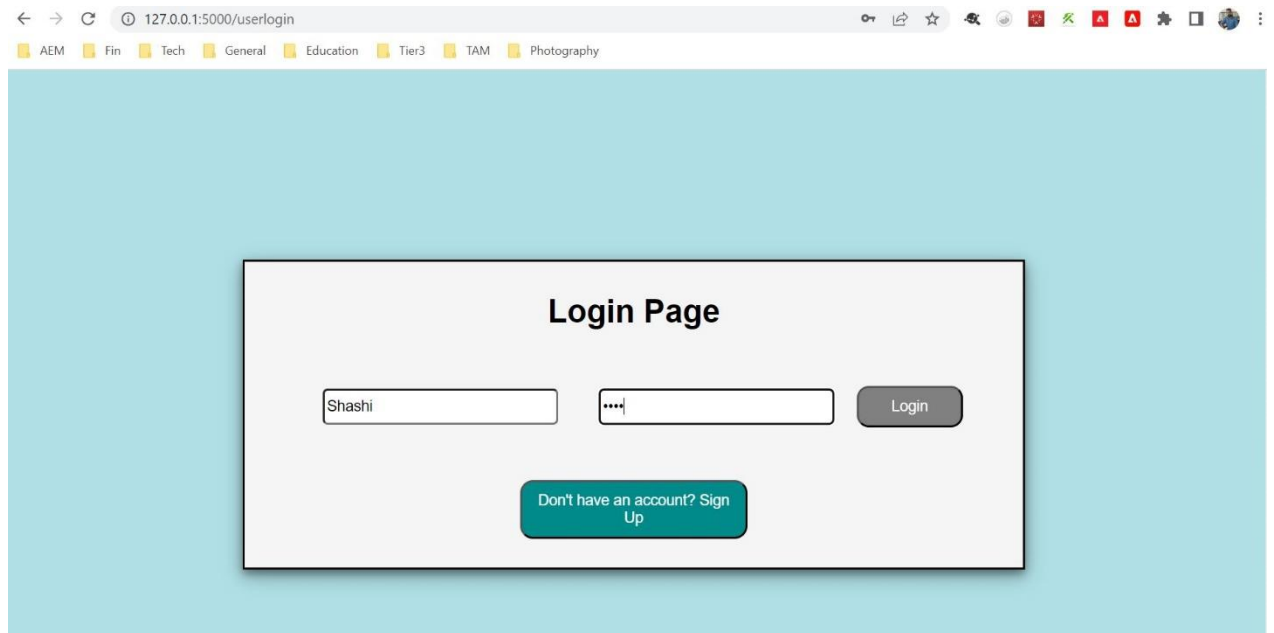

4. Registration Page

5. Database Screenshot

6. Login Screenshot

7. Loan Eligibility Screenshot
